The Home Improvement Program is designed to help income-eligible resident homeowners in York County, by providing financial and technical assistance to obtain necessary home repairs. The funds for home improvements are provided in the form of a zero-interest loan with a deferred payment. This means that a mortgage in the amount of the loan is filed against your property for security. When the property is sold or transferred, the full balance on the loan becomes due and payable to the County of York from a portion of the sale proceeds. The staff of the Home Improvement Program will help you through the financial and technical aspects of the program from initial inquiry, securing bids, to monitoring progress on the rehab work.

Grant funds may be available for necessary home repairs to eligible homeowners who are 55 and older, or disabled individuals who have an annual household income at or below 50% of the area median. Grants will be awarded up to \$10,000 and will be used to address health and safety risks, code violations, mobility improvements, and weatherization supplements.

WEATHERIZATION PROGRAM

- ◆ The State and Federal government, through the Department of Energy and Department of Health and Human Services, and the County of York through the York County Planning Commission, provides this program to help people who have a limited income so that they can lower their fuel bills, save energy, and have more comfortable homes in the process.
- ◆ The Weatherization Program has offered these services since 1972, and more than 10,000 families have benefited from taking part in the program. Homes that have been previously served are not eligible for re-service.
- ◆ Both homeowners and renters are eligible to apply for the services. Renters need to have the consent of their landlord to participate. The agreement with the landlord contains several conditions, including a shared cost requirement for rental properties.
- ◆ For those who are eligible, the work is done free of charge.
- ◆ Specially trained workers make specified repairs to your home so that it becomes more snug, secure, and cheaper to heat and cool.
- ◆ Services include, but are not limited to, attic and basement insulation, hot water heater and pipe insulation, window and door weather stripping, caulking, broken glass replacement, and glazing.
- ◆ No lien is filed against your home.
- ◆ Also, as part of the Weatherization Program, your furnace and hot water heater will be tested for its efficiency and safety. Inefficient or unsafe furnaces will be repaired or replaced. All work is done on an as-needed basis.
- ◆ In addition, the program provides education on ways to use and save energy wisely.
